Founder Profile -- Lois-Kleinner Alpasan

Anticloud FZ LLE * K_PX4

Executive Summary

Lois-Kleinner Alpasan is the CEO and CTO of Anticloud FZ LLE -- a 22-year-old sovereign AI infrastructure founder building the world's first complete alternative to cloud-dependent AI. Based in Dubai, UAE, operating under UAE Free Zone Limited Liability Establishment law, with active USPTO patent filings and a research corpus spanning 50+ publications across 13+ academic and professional platforms.

This is not a product company with a technical co-founder. This is a technical founder who built the product.

Identity & Role

• **Full name:** Lois-Kleinner Alpasan

• **Title:** CEO and CTO (unified technical and executive leadership)

• **Age:** 22

• **Entity:** Anticloud FZ LLE, Dubai, United Arab Emirates

• **Domain:** 0-1.gg (live)

• **Email:** lois@0-1.gg

• **ORCID:** 0009-0009-2233-6107

• **Harvard Dataverse DOI:** 10.7910/DVN/YMJKOG

• **Zenodo DOI:** 10.5281/zenodo.20781790

• **AIOSS Genesis Hash:** `8b4a8a4f6312dfbe885de8280716985637c163fd2a4b5590341d56db1cc4e560`

Why CEO = CTO Is a Strength

Most AI infrastructure companies have a product CEO and a technical co-founder. The result: misalignment, diluted IP, co-founder risk, and architectural decisions made by committee.

Anticloud FZ LLE's architecture was designed, implemented, and tested by one person. This means:

• **Zero IP fragmentation** -- every invention is owned 100% by Anticloud FZ LLE

• **No co-founder equity dilution** at founding

• **Architecture coherence** -- AIOSS, KANTOR K5, PAX quantization, and the single-binary deployment model are a unified system, not assembled from parts

• **Speed** -- the full 199-project corpus was built, benchmarked, and published in a single development sprint

• **Pattern matching** -- Linus Torvalds (Linux), Michael Widenius (MySQL), Vitalik Buterin (Ethereum). Unified technical leadership at founding is the rule for platform companies, not the exception.

Academic & Research Profile

Publications

• **50 original research articles** across Dev.to, Telegraph, WordPress, HuggingFace, Mastodon, Bluesky, Tumblr, Zenodo, OSF, Harvard Dataverse, Internet Archive, Google Drive, Notion

• **146 Zenodo DOIs** with permanent archival -- DOI: 10.5281/zenodo.20781790

• **145 Harvard Dataverse items** -- DOI: 10.7910/DVN/YMJKOG

• **144 OSF items** -- Open Science Framework, peer-indexed

• **145 WordPress posts** -- anticlouds.wordpress.com

• **31 Internet Archive items** -- permanently archived

• **112 Google Drive items** -- raw research data

• **145 Notion pages** -- methodology documentation

Research Coverage

All 199 Anticloud projects have corresponding published research:

• Architecture white papers

• Benchmark methodology papers

• Compliance framework analyses

• Competitive differentiation studies

• Economic and cost modeling

• Security threat modeling

• TRL readiness assessments

ORCID Profile

ORCID: 0009-0009-2233-6107

Cross-platform researcher identifier linking all 50+ publications across every indexed platform. Verifiable at orcid.org/0009-0009-2233-6107.

Platform Presence

| Platform | URL | Items |

|---|---|---|

| HuggingFace | huggingface.co/kleinnner | 145 dataset items |

| GitHub | github.com/kleinnner/Anticloud | Full codebase |

| Dev.to | dev.to/kleinner | 50 posts |

| Zenodo | doi.org/10.5281/zenodo.20781790 | 146 DOIs |

| Harvard Dataverse | doi.org/10.7910/DVN/YMJKOG | 145 items |

| OSF | osf.io (kleinnner) | 144 items |

| WordPress | anticlouds.wordpress.com | 145 posts |

| Mastodon | mastodon.social/@kleinner | 145 posts |

| Bluesky | bsky.app/profile/kleinner.bsky.social | 145 posts |

| Tumblr | anticloud.tumblr.com | 145 posts |

| Internet Archive | archive.org | 31 items |

| Google Drive | drive.google.com | 112 items |

| Notion | notion.so | 145 pages |

| LinkedIn | linkedin.com/in/kleinner | Active |

Technical Achievements

PAX L5 Narrow L2 General 27B

• Designed and implemented the quantization pipeline

• Achieved 61.86% TruthfulQA (vs GPT-4: 59.0%) -- +2.86 percentage points

• Achieved 100/100 MITRE ATT&CK; Navigator score -- only published 100/100 result for 27B parameter class

• Implemented GPTQ-8bit single-binary deployment with no cloud dependency

• Deployed with enable_thinking=True (Qwen3 architecture cognitive chain)

AIOSS Ledger

• Designed SHA3-256 append-only audit chain

• Formula: `H_n = SHA3-256(H_prev || entry_hash_n || timestamp_n)`

• Genesis block: `8b4a8a4f6312dfbe885de8280716985637c163fd2a4b5590341d56db1cc4e560`

• Provides cryptographic provenance for every AI inference output

KANTOR K5 Integrity Protocol

• `SHA3-256(archive_sha3 || file_size_le64 || project_name_utf8 || NULL || timestamp_iso)`

• Immutable file integrity seal used across all 199 projects

199-Project Corpus

• 9 technology tiers spanning AI infrastructure, biosignals, RF/mesh, robotics, defense

• All projects at TRL 8-9 (production-ready)

• Full compliance: SOC2 93%, ISO 27001 97%, NIST 98%, MITRE 100/100

Legal & IP

• **Patent Status:** Patent Pending (USPTO) -- applications filed under Anticloud FZ LLE

• **IP Owner:** 100% Anticloud FZ LLE

• **Entity type:** UAE Free Zone Limited Liability Establishment

• **License:** Apache 2.0 (open) / Anticommons Enterprise License 1.0 (commercial)

• **Trade Secret protection:** Core model architecture protected as trade secret

• **Anticommons License:** 199 projects x ANTICOMMONS_LICENSE.md -- enforced across all deployments

Media Kit Assets

• Photo: contact lois@0-1.gg

• Logo: 0-1.gg/assets/anticloud-logo.svg

• Brand colors: #C83218 (Anticloud Red), #0D0D0C (Background), #F0EDE4 (Text)

• Press contact: lois@0-1.gg

• Legal contact: lois@0-1.gg

• Technical questions: lois@0-1.gg (CEO = CTO)

Trajectory

• **Age 22:** Founded Anticloud FZ LLE, designed and shipped PAX L5 Narrow L2 General 27B

• **PhD track:** Anticipated 2026-2027 (sovereign AI infrastructure, distributed systems)

• **Research output:** 50+ publications across 13 platforms before first institutional affiliation

• **IP filed:** Before Series A, before co-founders, before external hires

This founder ships. The 199 projects are not a pitch deck -- they are working software, benchmarked, published, and protected.
